Nay Linn

Full Stack Engineer | Laravel, React, Vue.js, Next.js & Express.js |
MySQL, MongoDB
Bangkok City, Thailand

Summary

Software Engineer with 6+ years of experience building, maintaining, and optimizing full-stack applications and RESTful APIs across Yangon, Bangkok, and Tokyo. I specialize in full-stack development, API integration, production troubleshooting, and application optimization, with hands-on experience in system architecture, database design, third-party integrations, and deployment. I have worked across POS, Loyalty, VAS, Payment Systems, Viber Business Messaging, Online Registration, E-commerce, Chatbot, Web Scraping, and SaaS platforms. I focus on improving performance, scalability, reliability, and security while delivering practical solutions for real-world business requirements.

Experience

App.com.mm

Senior Laravel Developer

November 2025 - Present (10 months)

Yangon

- Develop and maintain full-stack platforms, including POS, Loyalty, Money Changer, and CMS-based e-commerce systems.
- Troubleshoot and resolve complex production issues, and contribute to new platform development from system architecture and API design through deployment.
- Improve application performance, scalability, reliability, and security across frontend, backend, and infrastructure layers.
- Design, deploy, and manage WordPress-based SaaS applications on VPS infrastructure, supporting the full development-to-production lifecycle.

株式会社 PROFESSY

Web Developer

February 2025 - July 2025 (6 months)

Tokyo, Japan

- Tested and deployed customized chatbot solutions for e-commerce platforms, ensuring reliable integration and functionality.
- Developed Node.js/Express APIs to track chatbot user actions across multiple websites.
- Deployed and managed services on Heroku, supporting application availability and maintenance.
- Used Docker for containerized development and environment consistency.

Chanjao Longevity Co., Ltd

Programmer

January 2024 - December 2024 (1 year)

Bangkok, Thailand

- Enhanced “MySkinRecipes,” a CMS-based e-commerce platform, by improving order processing workflows and implementing new APIs.
- Investigated and resolved complex production issues across shopping cart and checkout workflows, addressing data inconsistencies and transaction state errors.
- Upgraded and maintained an existing headless browser-based web-scraping system to support its latest version and ensure continued reliability.

Blue Ocean Operating Management Co., Ltd.

Senior Software Engineer

July 2022 - August 2023 (1 year 2 months)

Yangon

- Maintained existing and integrated new payment gateway solutions across major Myanmar payment providers, including KBZPay, AYA Pay, CB Pay, UAB Pay, WavePay, Citizen Pay, MPU, and international platforms such as CodaPay.
- Handled QR-based payment processing and dynamic payment link workflows, ensuring reliable customer transactions.
- Maintained and troubleshoot Viber Business Messaging integrations, resolving gateway and messaging issues and managing cron jobs for automated broadcasting and monthly/yearly subscription management.

AGGA.IO Co., Ltd

Web Developer

July 2021 - June 2022 (1 year)

Yangon

- Contributed to developing the Myanmar Accountancy Council's online registration system, working on frontend/backend registration workflows and reporting functionality.
- Implemented payment gateway integrations with KBZPay and CB Pay, enabling online registration fee payments.

Secure Link Company Limited

Junior PHP Developer

May 2019 - June 2021 (2 years 2 months)

Yangon

- Contributed to developing "Nyan Gyi Shin," a subscription-based VAS platform with loyalty content and a reward-based quiz game.
- Contributed to developing "Tap Tube," a subscription-based Chinese movie streaming platform with Vimeo API integration for video delivery.
- Contributed to developing "Bay Din Ywar," a VAS astrology platform delivering personalized predictions from professional Myanmar astrologers.

Education

University of Computer Studies, Yangon

Bachelor's Degree, Computational Science · (December 2013 - November 2018)
