Nay Linn

Full Stack Engineer (PHP-JS-SQL-Linux-AWS)
Bangkok City, Thailand

Summary

Software Engineer with 6+ years of experience building scalable web applications and RESTful APIs across international environments including Yangon, Bangkok, and Tokyo. I focus strongly on application performance and security. In my previous roles, I optimized server request handling, database query execution time, and frontend loading performance across multiple production platforms. I also emphasize system architecture, database design, and modern programming paradigms. I have worked across a wide range of enterprise platforms and domains, including POS, LMS, Loyalty Systems, VAS, Business Messaging (Viber), Payment and API Integrations, Online Registration Systems, Real-time Messaging Systems, CMS-based E-commerce Platforms, Custom Chatbot Integrations, and Web Scraping/Data Extraction. Core Technologies: PHP (Laravel, WordPress), JavaScript (Node.js, Vue.js, React), MySQL, MongoDB, Redis, AWS, Docker.

Experience

App.com.mm

Senior Laravel Developer

November 2025 - Present (10 months)

Yangon

- Develop and maintain POS, Loyalty, Money Changer, and CMS-based e-commerce platforms.
- Diagnose and resolve complex production issues while designing and implementing new platforms from architecture to deployment.
- Enhance application performance, scalability, and security across full-stack environments.
- Designed, deployed, and managed WordPress-based SaaS applications from development to production on a VPS infrastructure.

株式会社 PROFESSY

Web Developer

February 2025 - July 2025 (6 months)

Tokyo, Japan

- Implemented and deployed customized chatbot integrations for e-commerce platforms.
- Developed an API to monitor chatbot user activity across multiple websites using headless browser automation.
- Deployed and managed services on the Heroku cloud platform.
- Adopted Docker for containerized development and environment consistency.

Chanjao Longevity Co., Ltd

Programmer

January 2024 - December 2024 (1 year)

Bangkok, Thailand

- Developed and maintained “MySkinRecipes” CMS-based e-commerce platform.
- Investigated and resolved complex production issues in shopping cart and checkout workflows, addressing data inconsistencies and transaction state errors.
- Implemented automated web scraping systems using headless browser automation.

Blue Ocean Operating Management Co., Ltd.

Senior Software Engineer

July 2022 - August 2023 (1 year 2 months)

Yangon

- Designed and maintained payment gateway integrations, supporting major Myanmar payment providers including KBZ Pay, AYA Pay, CB Pay, UAB Pay, WavePay, Citizen Pay, MPU, and international platforms such as Codapay.
- Implemented QR-based payment workflows and dynamic payment link generation for seamless customer transactions.
- Developed and managed Viber Business Messaging systems, implementing scheduled cron jobs for automated message broadcasting and subscription lifecycle management (monthly and yearly plans).

AGGA.IO Co., Ltd

Web Developer

July 2021 - June 2022 (1 year)

Yangon

- Developed and implemented the “Myanmar Accountancy Council”, online registration system.

- Integrated Myanmar payment gateways, including KBZ Pay and CB Pay, to support online registration payments.

Secure Link Company Limited

Junior PHP Developer

May 2019 - June 2021 (2 years 2 months)

Yangon

- Developed “Nyan Gyi Shin”, a subscription-based VAS platform providing loyalty tips and a quiz-based game where users earn rewards by answering questions.
- Built “Tap Tube”, a subscription-based Chinese movie streaming platform integrated with the Vimeo API for video content delivery.
- Implemented “Bay Din Ywar”, a VAS astrology platform where well-known Myanmar astrologers provide personalized predictions to users.

Education

University of Computer Studies, Yangon

Bachelor's Degree, Computational Science · (December 2013 - November 2018)
